

THE AFTERLIFE UNCOVERED

This film documentary is the work of a dedicated group of journalists and researchers with one common goal. To prove the existence of the afterlife and silence the critics for once and for all! Many scientific observers will argue that the notion of an afterlife is either unscientific or unprovable. Yet few can ignore the findings of the Scole Experiment or the pioneering work of Professor Robert Lanza, whose theory of consciousness has led many experts to ponder the impossible.

These studies provide a tantalizing glimpse into a parallel universe that has remained elusive until now. Whatever your beliefs, support for the Afterlife is growing and evidence from medium's and paranormal investigator's around the globe have seen a dramatic shift in how we perceive and deliver new information. Advances in technology have removed much of the guesswork from other-worldly communications and we look forward to some exciting new developments ahead.

As a media support group, Afterlife Uncovered aims to be one of the leading sources of information for those struggling with the question of survival. Afterlife Uncovered's global network of supporters are growing on a daily basis and we urge anyone interested to get involved and support our research.

Our long term objectives:

1. To promote and uncover evidence of survival in every major country around the globe.
2. To support investigator's and the spiritual community in discovering new ways of uncovering evidence of survival.
3. To advocate the setting up of an academic teaching institution to promote mediumship and psychical research.
